

January 31, 2022

The Honorable Raphael Warnock  
United States Senate  
388 Russell Senate Office Building  
Washington, DC 20510

Dear Senator Warnock:

We thank you for prioritizing consumers through your introduction of S.3339 *Capping Prescription Costs Act of 2021*. Consumers for Quality Care (CQC), a coalition of advocates, former policy makers, and 28 patient and consumer advocacy organizations committed to providing a voice for patients in the health care debate, is pleased to support this important legislation.

The United States of America should be leaders in providing affordable, quality health care. To this end, it is critical that Congress protect patients from facing exorbitant costs for care and treatment – especially during times of great struggle such as the COVID-19 pandemic.

Passage of your legislation would be a major step forward for the nation. Enactment of the carefully considered caps that reduce maximum out-of-pocket spending for coverage would help address the deep concern that consumers have for the rising costs of health care. With only six states currently limiting out-of-pocket costs for prescription drugs, we commend you for your leadership in bringing this issue to the national debate. It is vital that Congress continually take a supportive role to ensure that we can all afford the prescriptions we need.

Thank you again for introducing the *Capping Prescription Costs Act of 2021*. Please do not hesitate to reach out if we can be helpful and we look forward to continuing our support for this legislation.

Sincerely,

Consumers for Quality Care
